DETAILED ACTION

Claims 2, 3, 5-8 and 39-65 are pending in the application.

This Office Action is in response to the Amendment filed on 5/19/03.

Election/Restrictions

In response to the restriction requirement mailed on 9/2/02, Applicants elected Group V, drawn to a method of modulating cell proliferation comprising contacting cell with a polypeptide with that modulates the activity of a TRADE α molecule. The newly added claims 39-65 are drawn to a method for modulating activation of an NF κ B signaling pathway by contacting cell with a polypeptide comprising different and distinct sequences. Applicants must elect a single specific sequence (one SEQ ID) to which the claims will be restricted. Note, this restriction to examination of a single sequence is due to the now very high and undue burden for examining more than one sequence which is caused by the continued exponential increase of size of the sequence databases to be searched for each sequence, resulting in a corresponding increase in computer search time and examiner time for reviewing the computer search results. Therefore, the limited resources of the Office no longer permit examination of more than one sequence in an application.
